Education

University of Information Technology (UIT) - VNU-HCM

June 2026

Bachelor of Information Technology

- **GPA:** 8.69/10.0
- **Graduation Thesis:** "Building a Charity NFT Marketplace using Account Abstraction (ERC-4337) and Gasless Transactions".

Experience

Teky Academy

Sep 2024 – Feb 2026

STEM Instructor / Coding Mentor

- Instructed and mentored students in programming fundamentals using Python, Web Development (HTML/CSS/JS, Django), Games (Unity, Tynker) and Robotics.
- Translated complex technical concepts into easy-to-understand lessons, improving both communication and presentation skills. Managed classroom activities and tracked student progress, ensuring a high quality of learning experience.

Ky Luc Company

Nov 2024 – Feb 2025

Business Analyst Intern

- Analyzed business requirements and designed system architecture to facilitate the transition from offline processes to an online web-based platform.
- Created comprehensive System Requirement Specification (SRS) documents, Activity Diagrams, and Sequence Diagrams to support the development team. Collaborated closely with the Web Development team to ensure the final product met client requirements and business goals.

Projects

GuB - E-Commerce Platform 🌐 | 🌐 Live Demo | *Next.js 15, NestJS, Stripe, Supabase*

Jun 2026 – July 2026

- Built and deployed a full-stack e-commerce platform (customer storefront + admin dashboard), with a modular-monolith NestJS backend using PostgreSQL multi-schema isolation per module.
- Implemented the storefront with full-text search (pg_trgm), cart, Stripe checkout with webhooks, bilingual (EN/VI) i18n, SEO (per-product metadata + JSON-LD), and image optimization via a custom Cloudinary loader. Developed an admin dashboard with analytics, product/order CRUD.

Beng - Social Media Platform 🌐 | 🌐 Live Demo | *React, Node.js, Socket.io, LiveKit*

May 2026 – Jun 2026

- Architected a production-grade Instagram-style social platform with React 18 + Vite frontend and Node.js + Express + Prisma + PostgreSQL backend, featuring 50+ REST endpoints documented via OpenAPI/Swagger.
- Implemented real-time messaging using Socket.io (1-1 and group chats with voice messages, GIFs, reply-to) and integrated LiveKit Cloud for audio/video calls with multi-party support. Built Stories with music sticker feature (iTunes Search API integration)

Charity NFT Marketplace (Thesis) 🌐 | *NextJS, Solidity, ERC-4337, ERC-721*

Oct 2025 – Jan 2026

- Developed a decentralized NFT fundraising platform utilizing Account Abstraction to eliminate Private Key management and Gas fees for Web2 users.
- Implemented ERC-4337 architecture (Bundlers, Paymasters) and Web3Auth (Social Login/MPC) to enable 2-step onboarding via Google/Facebook.
- Built a Hybrid Indexer to sync on-chain data to PostgreSQL for real-time querying, and wrote ERC-721 contracts with automated revenue splitting.

Technical Skills

Languages: JavaScript/TypeScript, Solidity, HTML, CSS

Frontend: ReactJS, NextJS, TailwindCSS, TanStack Query, Zustand, Shadcn/UI

Backend & DB: NodeJS (Express), NestJS, Prisma ORM, PostgreSQL, MongoDB, Socket.io, REST API

DevOps & Tools: Git/GitHub, Docker, Stripe, Supabase, Cloudinary, Figma, OpenAPI/Swagger
